BORDER CONTROL SYSTEM BIOMETRIC

- Passport check
- Passport check Biometric watching system
- Passport check Secured crossing border process

AUTOMATIC SYSTEMS DETECTION & ANALYSIS SOLUTION (ASDAS)

ASDAS ensures single passage detection, essential to the automation of border and building entrance control, thus increasing throughput.

DETECTION

- Adults, children and people with disabilities, pushing or carrying any type of luggage or trolleys
- Able to detect the difference between an adult pulling a piece of luggage and an adult accompanying a child
- Piggybacking: side-by-side and tailgating detection

Side profile detection

Front profile detection
