

**EASIER takes-off,
Combining the best of IER & Automatic Systems Passenger Solutions**

London, 25 March 2019: This week at Passenger Terminal Expo in London, the world's leading airport, airlines and public transportation partnership is getting better.

EASIER is the combination of IER & Automatic Systems Passenger Solutions, providing our joint customers a more comprehensive product range for Airports, Airlines & Public Transportation projects.

As a newborn entity of IER & Automatic Systems, EASIER will leverage the best of two of the world's leaders and most successful airports, airlines and public transportation providers, while developing new products and services to offer a unique and differentiated passenger experience.

We are actively engaged in the evolution of technologies and strive to leverage these capabilities in enhancing the overall passenger experience. EASIER will enable us to collaborate in developing safe, cost-efficient and value-added solutions, through a dedicated, dynamic and customer-centric organization.

EASIER stands for Intelligent Equipment for Public transportation, Airports, Airlines & Immigration markets relying on Passengers systems expertise, Solution Design, Value on Investment, Product Reliability & Service Excellence.

Visit us this week at Passenger Terminal Expo EASIER booth #2050

About EASIER

The history of IER and Automatic Systems dates back the early 60's with first significant milestones for both companies as providers of airports, airlines and public transportation markets. 1971 marks the beginning of Automatic Systems international expansion with the supply of +100 rising barriers to Frankfurt international airport followed by various important contracts with prestigious Public transportation & Airports customers such as SNCF French railways, Paris Aéroport, STIB Belgian railways, Manilla Subway system, Santiago de Chile underground to name a few. Meanwhile, from 1977, IER positioned itself in the air transport market when it launched the first air ticket printers with Air France and Swissair as its first customers. Since then IER has been the provider of choice of the global aviation industry, delivering innovative passenger processing solutions from check-in to security, to the boarding gate and customs arrivals.

EASIER stands for Intelligent Equipment for Public transportation, Airports, Airlines & Immigration markets.
